

Fresh Breath for Pets!

durafresh™ 

PET BREATH SPRAY

ZINNELÉ

ANTI-CAVITY
ANTI-MICROBIAL
PROTECTION

YES! Durafresh has a Pet Care line. Everyday, pets mouths are invaded by millions of bacteria and other microbes that cause bad breath and gum disease. More than 85% of dogs and cats over four years old have some form of periodontal disease, a painful inflammatory condition in which bacteria attack the gums, ligament and bone tissues that surround and support the teeth. Our competitors have always relied on cleaning with abrasive and toxic ingredients, and deodorizing with fragrances that merely mask odor. DURAFRESH products utilize stabilized chlorine dioxide (ClO₂) to help eliminate bad bacteria (anaerobic) and other microbes through an oxidation process, leaving your pet's mouth fresh, clean and pure. DURAFRESH, redefining pet oral care by safely harnessing the NATURAL cleansing power of OXYGEN!
